## CONSTRUCTION UPDATE

ISSUE 13
October 19, 2012

***Building "A": In this photo you can see work being done to the construction of the building envelope, in preparation for the installation of the windows, brick and siding.***

### *Project Status Update*

***Building "A":*** Roofing of Building "A" began on October 4th and is scheduled to be completed by the end of October. The installation of the moisture and air barrier for the concrete structure is now complete. Currently, the exterior finishes are being installed. The curbs, sidewalks and paving is now complete and the final stages of the soft and hard landscaping will be completed by the end of October.

***Building "B":*** The project team has experienced some delays with the interior finishing of Building "B". Construction work on the building will be occurring six days a week to ensure that the building is completed as soon as possible. Move-in for the new residents is now scheduled for mid- February to early March 2013.

### *Safety First*

Construction areas are clearly marked with signs, and barriers have been installed to keep pedestrians out of the active construction sites on campus. Please be vigilant and obey the posted signs and safety directions.

### *Parking & Traffic Update*

On October 22, 2012, the new entry/exit gates to the Perley Rideau campus will be operational, and additional parking spaces will be available in front of the Rideau building entrance. We ask for your continued patience and observance of posted construction and pedestrian cross walk signage, as there will still be construction traffic on site.
