## 2022/23 Quality Improvement and Safety Plan - FINAL

2022-07-04

<b>QUALITY FRAME</b>	WORK	Measure						Change Change				
			Unit /		Current			Planned improvement initiatives			Target for process	
Pillar	Aim	Measure/Indicator	Population	Source / Period	performance	Target	Target justification	(Change Ideas)	Methods	Process measures	measure	Comments
Priorities for FOCUSED ACTION												
	Improve safety culture score	Culture of Safety	Overall Weighted Average Safety Culture Score (scale of 1, low to 5, high)	Culture of	2.77	2.9	2021/22 target not achieved; however performance improved slightly from 2.75 to 2.77. No benchmark data available for comparison. Target reflects the complexity of the issue	1)Psychological health & safety work - implement Mental Fitness Index action plan  2)Define" psychological health and safety" at Perley Health and outline guiding principles		Inplementation status (short-term)     Implementation status (mid and long-term)  1)Completion status	March 2023  1) Completed by June 30, 2022	aligns multiple streams of work, e.g. Accreditation Canada standards/ROPs, Perley Health focus on staff health and wellbeing (MFI),
							(changing an organization's culture can be quite difficult and is a long-term endeavour).	3)Continue to strengthen education on Just Culture, promoting open communication  4)Continue to participate in CPSI	Actions to be aligned with Psychological Mental Health & Safety work.  Continue the practice of Annual Safety	1) Education on Just Culture 2) Staff familiarity with Just Culture through survey  Staff ongagement/participation in key	education provided to different groups	psychological health and safety, Psychologically Safe Leaders, Employee Engagement
								Patient Safety Week (typically held last week in October)		events flagged by the team	released	
•	Provide "right" care 100% of the time	Percentage of Residents who Experienced Pain	% / Residents	CIHI CCRS / July - September 2021	11.3	10	2021/22 target achieved. Changes in practice aligned with BPG on Pain Management largely implemented in 2018.	1)Review/evaluation of key practices introduced to identify and develop plan of care for managing resident pain (aligned with goals of care)	Evaluation will include internal evaluation of current state and comparison to self-identified peers (e.g. Baycrest) to identify prevailing practice	1)Completion status		
							Current focus is on evaluating changes and adjusting as required.  NOTES: Provincial average = 4.4% (Q2 2021); however, the literature suggests proportion of LTC residents with some level of pain is	2)Identify and implement changes in practice based on evaluation	Tentative - Kaizen event in 2022 (or through intensive small committee work). Changes pending completion of evaluation work	1) Completion status	and ready for testing Oct 2022	
							around 40-80%.	3)Sustain hourly comfort care rounds by interprofessional team to assess pain, positioning, toileting needs, personal environment.	,	1) % hourly rounds documented on rounding log 2) % of staff shadowed on day and evening shift that meet rounding expectations 3) % of staff on night shift that meet night rounding expectations	90% compliance for all measures	
Priorities for MO	DERATE ACTION											
Better	Provide "right"	Proportion of long-	Proportion / at-	Local data	N/A	>80%	Data represents percentage	1)Continue to implement "End-of-life	1) Develop End-of-Life program policy	1) Completion status	1) Policy completed by	/
Experience of	care 100% of the time	term care home residents with a progressive, life-threatening illness who were identified to benefit from palliative care, who have their palliative care needs identified through a		collection (PCC)/			of residents identified as "end-stage" in RAI-MDS who had palliative/end-of-life care needs documented in plan of care. PPSv2 and CFA	care during last days and hours" best practice guidelines from RNAO. Work	aligned with best practice guidelines	2) Completion status of care plan library review & update 3) Implementation of process	October 31, 2022 2) Care plan library updated by September 30, 2022 3) New process implemented on all units by December 31, 2022	

QUALITY FRAMEWORK		Measure	11		·			Change					
Dillon		Unit / Current Planned improvement initiatives  Measure/Indicator Population Source / Period performance Target Target justification (Change Ideas) Methods Process measures								<b>D</b>	Target for process		
Pillar	Aim	comprehensive and holistic assessment.	Population	Source / Period	performance		process to formalize a plan of care aligned with the findings of these assessments and the resident/SDM preferences.		1) Ongoing auditing to validate completion of CFA aligned with care conferences on long-stay units.	1) % of residents on long-stay units with completed frailty assessments	1) 100% of residents on long-stay units with completed frailty assessment prior to care conference	Comments	
Better Experience of Care	preventable harm by 50%	Number of substantiated staff to resident abuse/neglect incidents reported to the MOLTC through CIS System	# of incidents	Ministry of Health Portal / Jan - Dec 2021	3		Indicator has been amended for 2022/23 QIP to focus on substantiated incidents vs reported incidents. Resident abuse and neglect (verbal, physical, sexual, financial) is identified as a "never event" at Perley Health, as such, the Home will continuously work towards a goal of 0 substantiated events. Perley Health acknowledges an important contributor to resident abuse is physically responsive behaviours by coresidents. This issue is addressed under the "Reduce Responsive Behaviours" objective in the QIP.	improvements, including policy review, enhanced education and awareness (abuse, reporting and whistle-blowing)	staff, resident/care team involved in	1) Completion status e.g. enhancements to investigation process and support to those involved 2) Employee attendance at Abuse Awareness Week activities	2) 60% of staff recorded	Leverage BPG on Preventing and Addressing Abuse and Neglect of Older Adults. Incident investigation work aligned with Psychological Mental Health & Safety work (MFI action plan)	
Better Experience of Care	Reduce preventable harm by 50%	Infection Prevention and Control Program	N/A	N/A			Focus of the work in this area is to strengthen/further develop existing program/infrastructure to minimize risk to residents	1)Sustain hand hygiene audit program	Progress to be monitored by Manager, Infection Control and IPAC committee.	1 .	1) 450 observations per month 2) 85% compliance		
							related to infections.	2)Targeted improvements to COVID response as identified (focus on effectiveness and sustainability)	TBD	TBD	TBD		
								3)Provide outreach/support to other LTCHs r/t COVID response and other areas	TBD	TBD	TBD		
Better Experience of Care		Percentage of residents on antipsychotics without a diagnosis of psychosis		CIHI CCRS / July - September 2021	19.3		2021/22 target not achieved; however Perley Health is currently performing better than the provincial average (@ 20.3% Q2 2021). Background info: In early 2018, facility opened a 20-bed Specialized Behavioural	1)Complete data review to understand current drivers of facility-level performance	Corrective action may be required based on data review findings	1) Completion status of data review	completed September 30, 2022	Not included in Ontario Health Priority List. Publicly reported indicator (CIHI Your Health system).
